

Roulette Dashboard

User Manual

We are not an online casino and we do not offer any dubious winning systems for prediction!

Note: In gambling, winning or losing depends on chance. We therefore expressly advise against playing with real money stakes. Use our app only in connection with play money (in demo mode) within legal online casinos.

Furthermore, comply with the age regulations in your country regarding gambling.

Wheel

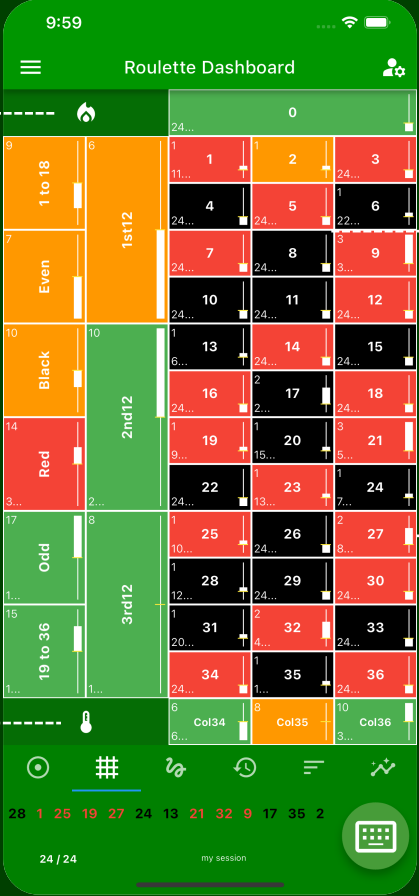

Global menu with additional functions, e.g. creating sessions or importing/exporting roulette numbers.

Table

Heatmap, with cold/hot numbers depending on the current result (cf. details view).

Pressing the table fields (as in betting in the casino) opens details view.

- Alle Simple odds (1:1)
- Dozens (1:2)
- Columns (1:2)
- Six Lies / Double Streets (1:5)
- Streets (1:11)
- Corner/Squares (1:8)
- Splits (1:17)
- Straights (1:35)

Number of hits

Absence of hits

Current result (positive or negative distance to zero axis) in relation to minimum and maximum result

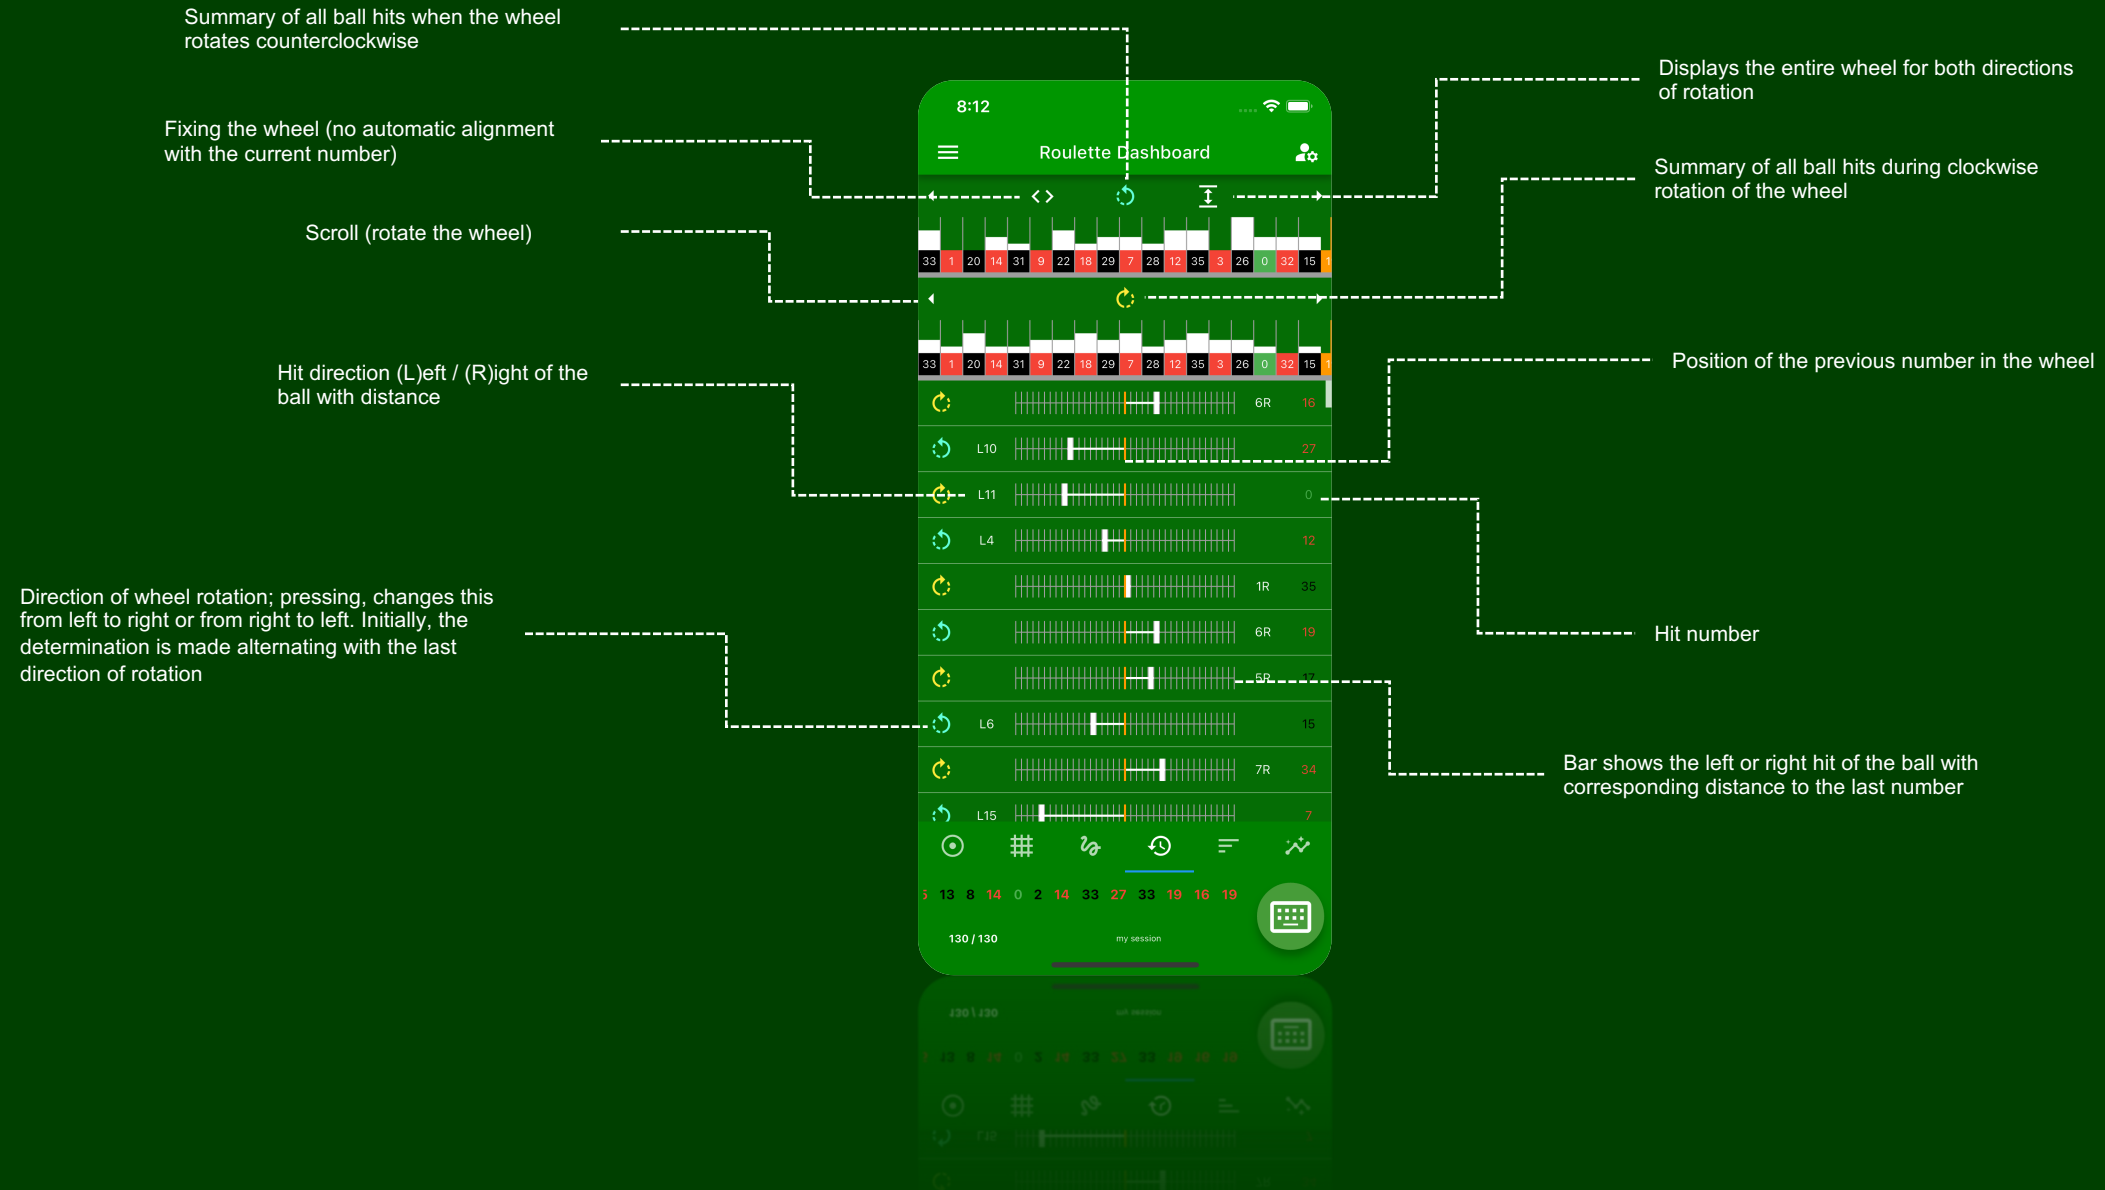

Flat Wheel

Arrangement of
numbers in the wheel
from top to bottom

Hits of the number over
time; the most recent hit
is shown on the far right

Throwing Behavior

Ranking

Alternative metric for determining the order

Absence of hits

Balance (Profit - Losses)

Standard Deviations (-3 bis +3 Sigma)

0 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36

Ranking (Index) after sorting

Hits

Odd

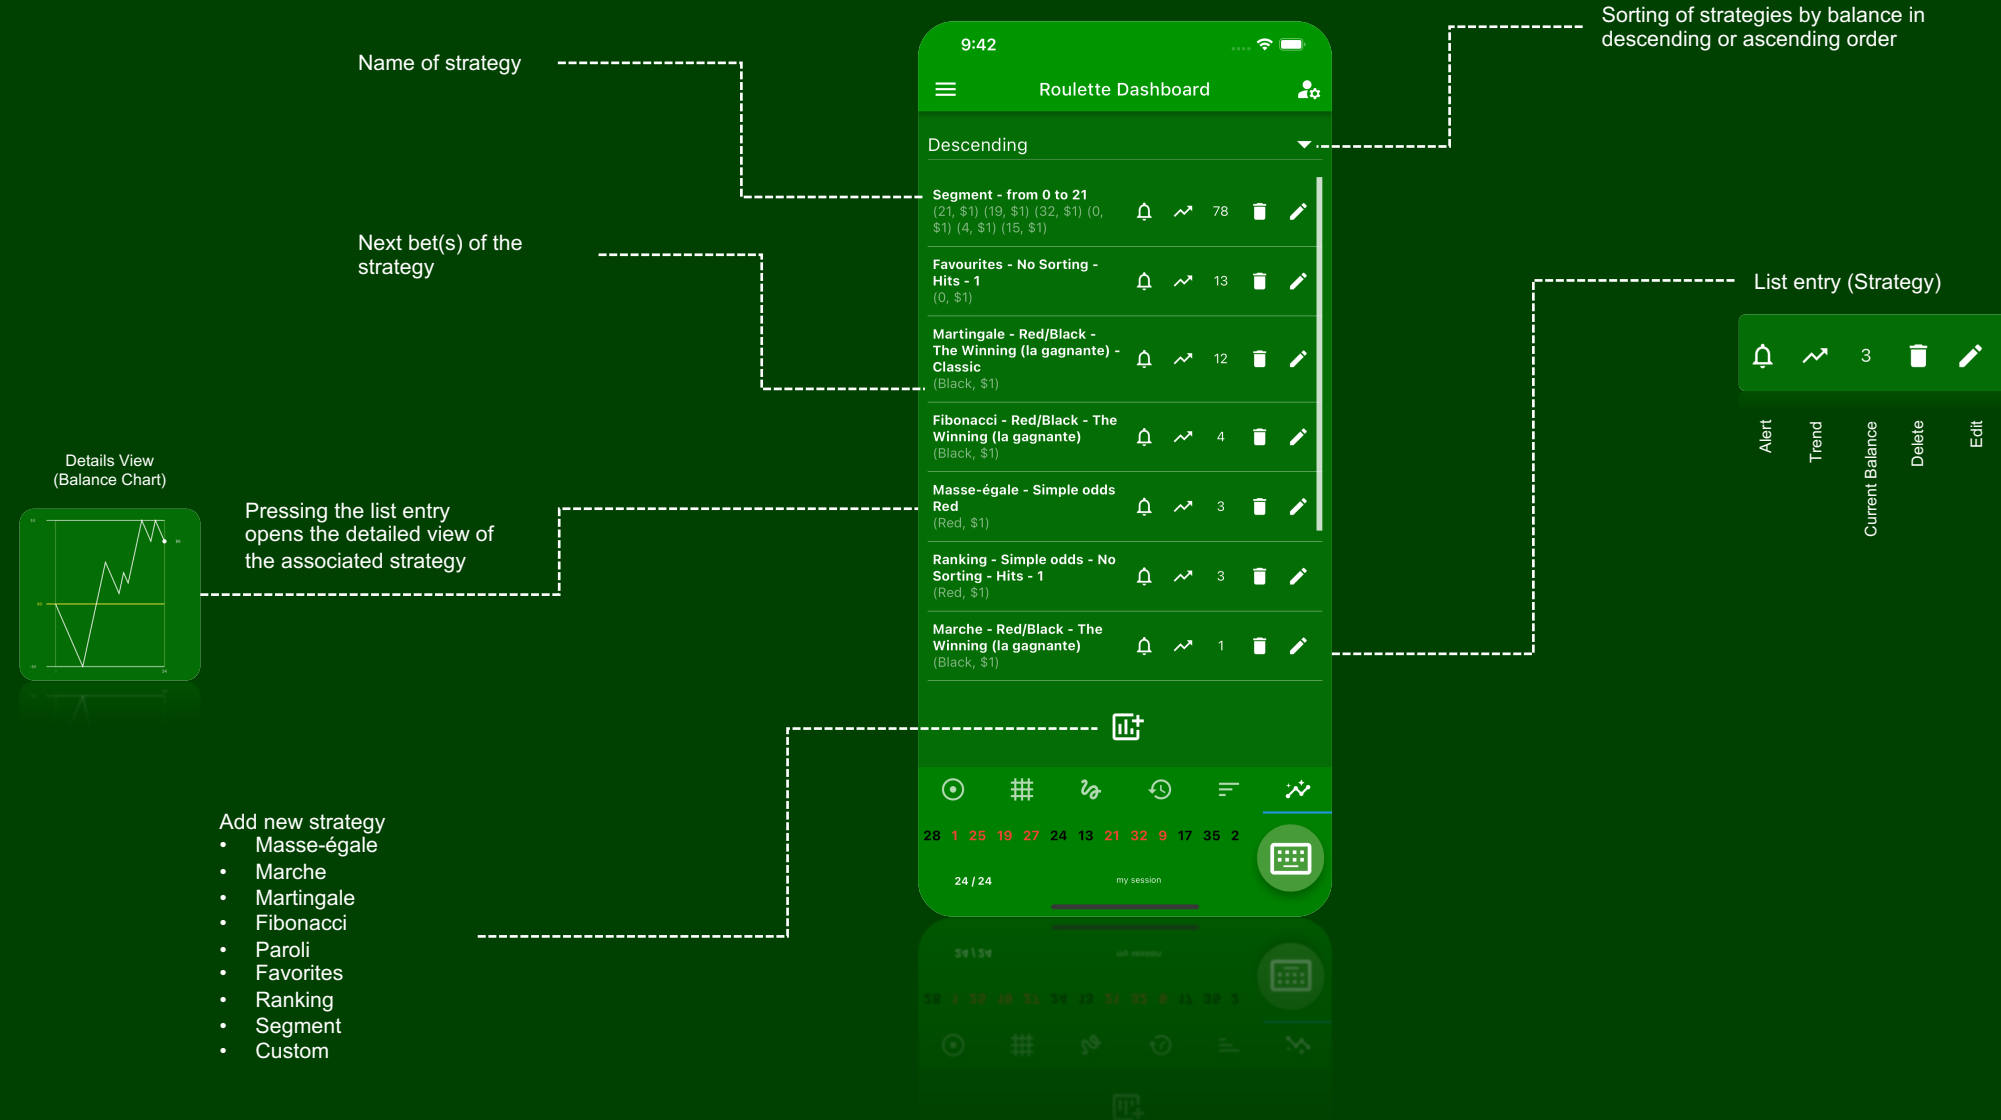

Selection of odd collections

- Simple odds (1:1)
- Dozens (1:2)
- Columns (1:2)
- Dozens and Columns (1:2)
- Six Lines / Double Streets (1:5)
- Streets (1:11)
- Corners (1:8)
- Splits (1:17)
- American Wheel (1:35)
- European Wheel (1:35)

Selection of the sorting of the list in descending or ascending order

Representation of the metric (e.g. number of hits)

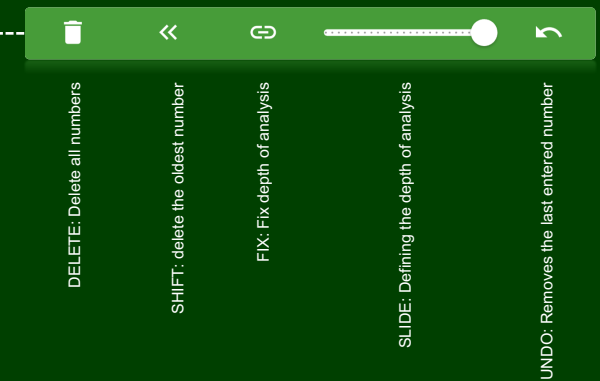

Strategies

Input

Editing the number sequence

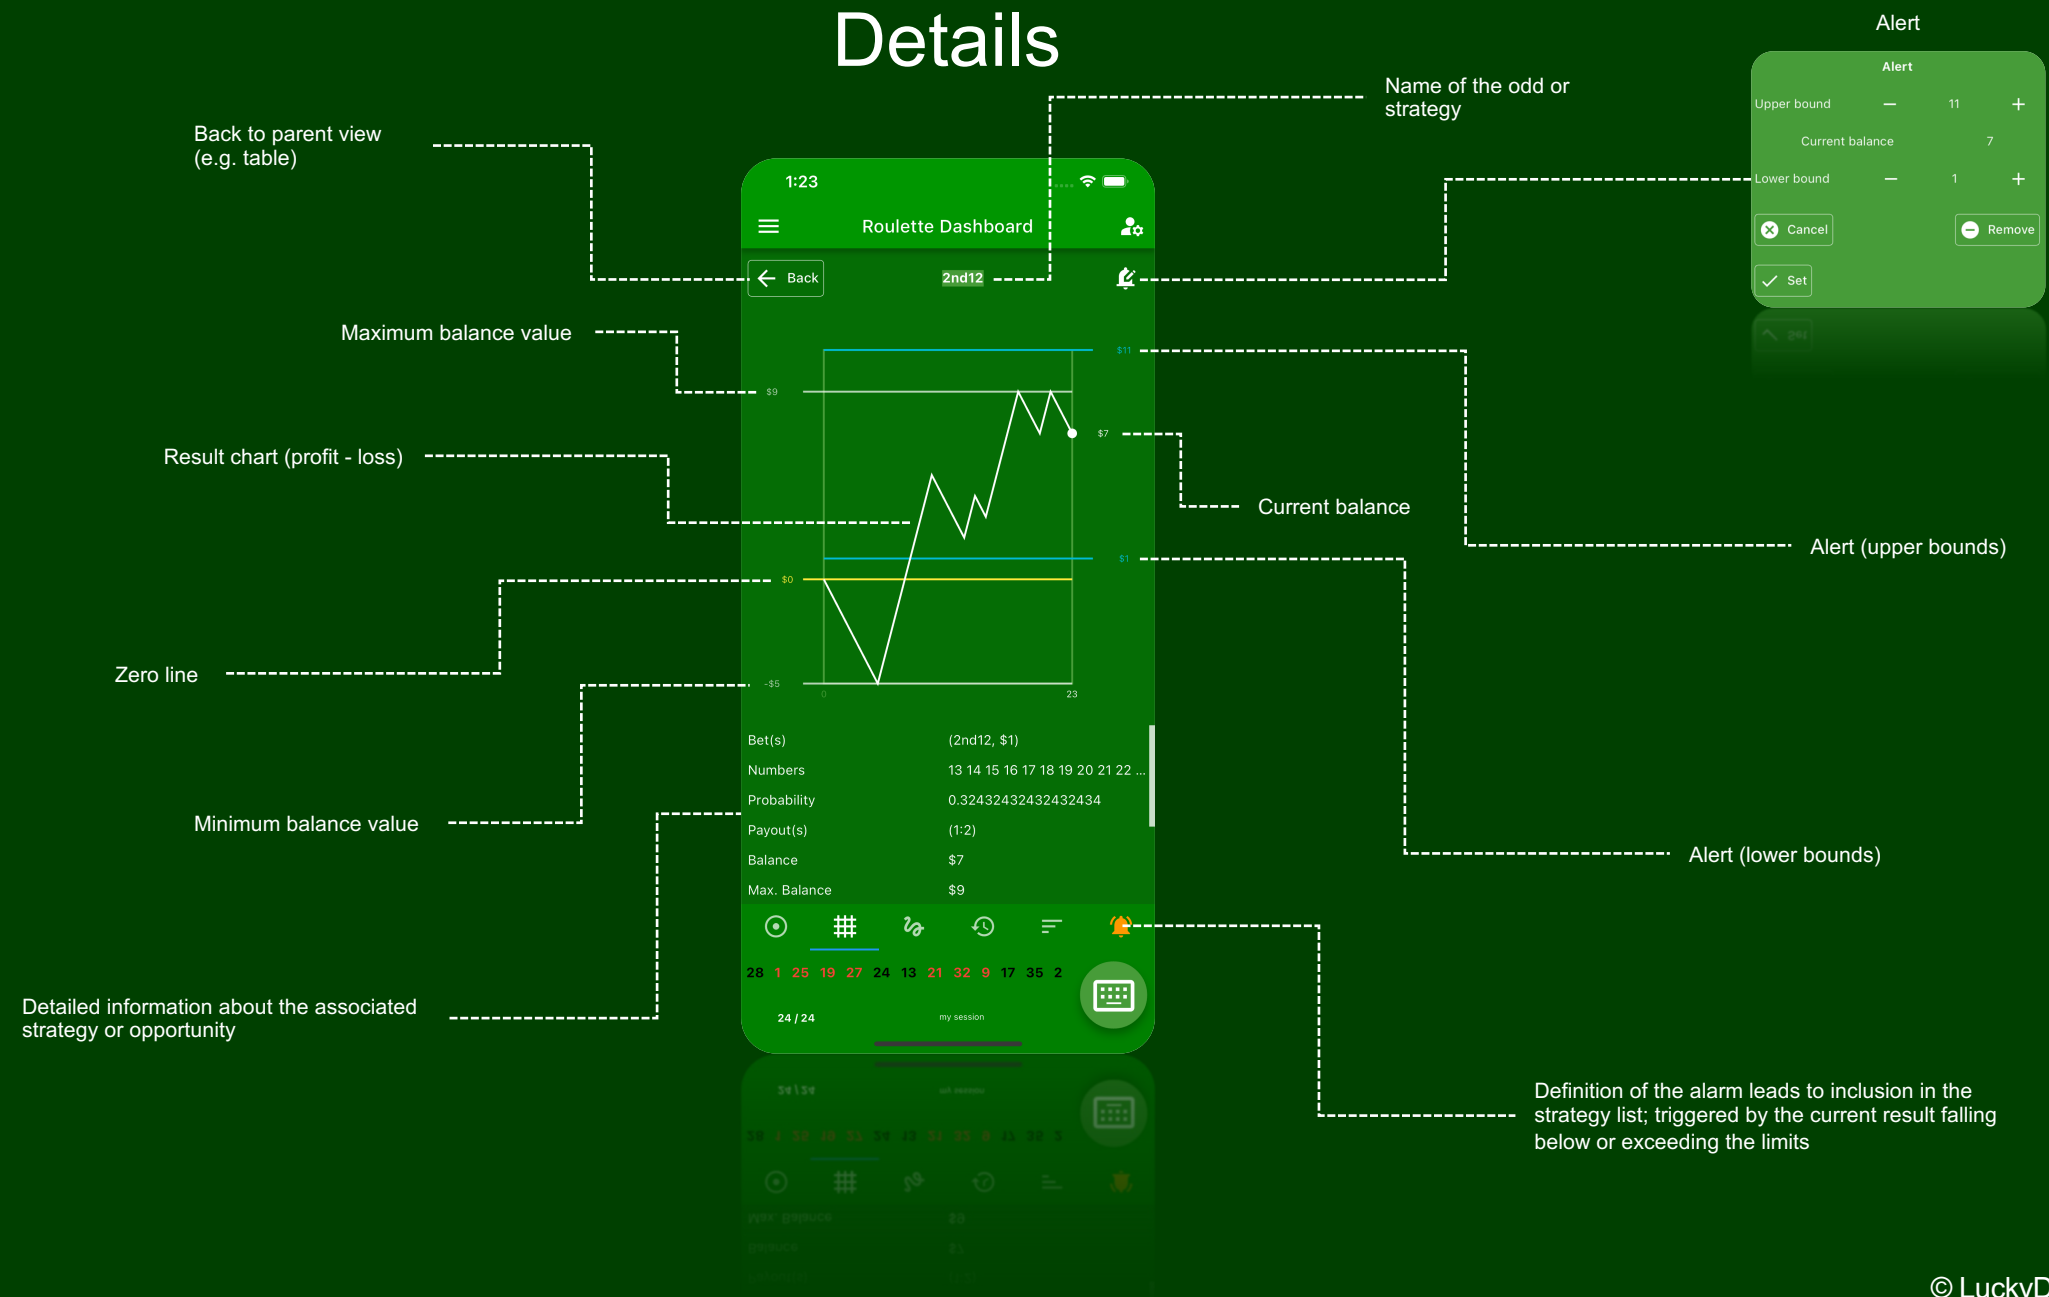

Pressing the roulette number leads to entering the number and refreshing the view

Random number generator to generate roulette numbers

Closes the number input again for a better overview

Due to the fixed analysis depth, only the 'n' last numbers are considered

Details

We would like to improve our app constantly, do not hesitate to send us your suggestions: support@roulettedashboard.com
